

com.tom

IEC 61850 implementation in your com.tom

short time-to-market

com.tom

Your com.tom adapts itself to your requirements.

Programming

You can program and configure your com.tom easily with:

- C/C++, CODESYS (IEC 61131-3)
- WEB-PLC, Portal
- Configuration of the API and models and standard SCL

Equipment

Your com.tom has any number of interfaces:

- Ethernet
- USB
- SD card
- RS232/RS485/RS422
- CAN, M-BUS
- GPRS, UMTS, LTE, ...
- Digital I/O
- Security (OpenVPN,...)

You can also combine these

Function

The IEC 61850 and IEC 61400-25 software is implemented in your com.tom:

- Client/Server (C/S)
- Control
- Messages (unbuffered/buffered)
- GOOSE (Publisher/Subscriber)
- Sampled values
- Time synchronization via SNT
- File transfer
- Read out self description
- Ready-to-go API (C/S, P/S)

and many other protocols:

- IEC 60870-5-101/104
- Modbus
- DNP3
- CAN-Bus

For controllers, monitoring, gateways, ...
