

Product Change Notification

Change Notification #: 201503-01

Change Title: com.tom PORTAL – Kolibri technology

Date of Publication: February 26, 2015

Key Characteristics of Change:

Software change

Impact of Change:

Form and function.

com.tom PORTAL major technology upgrade.

Affected products:

| Product code | Description | Product code (v2.x) |
|--------------|------------------------------|---------------------|
| 40000001 | com.tom PORTAL Project Setup | 40000017 |
| 40000002 | com.tom PORTAL Unit Setup | 40000018 |
| 41000001 | com.tom PORTAL Service Fee | 41000015 |

Identification of changed part:

Changed project URL: <https://project-name.com-tom.io>

Version designation: Version 2.x.x

Description of Change to the Customer:

The existing *com.tom PORTAL v1.x* - based on COMP/iCex technology - will be replaced by the new *com.tom PORTAL v2.x* based on Kolibri technology. The new technology offers improved functionalities, performance and security.

For new projects, after the specified shipment date all products listed above will be delivered with the new product code (v2.x) and the upgraded revision.

Reason for Change

Functional enhancements.

Customer Impact of Change and Recommended Action:

Significant changes are expected with respect to the existing *com.tom PORTAL v1.x*. Beck recommends a full qualification of the application with the new *com.tom PORTAL v2.x*. There is no automatic upgrade procedure. Projects, gateways and applications must be setup newly with *com.tom PORTAL v2.x*.

The *com.tom PORTAL v1.x* will stay in service until the last service date specified. Customers using it should contact Beck for support with the migration to the improved *com.tom PORTAL v2.x*.

Forecasted Key Milestones:

| | |
|---|-------------------|
| Date of first proposed availability (v2.x): | February 26, 2015 |
| Date of first proposed shipment (v2.x): | February 26, 2015 |
| Last service date (v1.x): | December 31, 2015 |
